Building Permit Valuation

The Building Permit Fee charged to build a new building, to add on to an existing building, to remodel or to alter an existing building shall be based on the declared valuation of the proposed work.

Residential One and two-family dwelling---the minimum value of \$70.00 square foot of total area under roof shall be used to determine the valuation for the purpose of computing permit fees in accordance with the Building Permits Fee Chart or whichever is greater.

Total Valuation-Residential: The minimum total valuation is determined by multiplying the total square footage under roof by \$70.00 per square foot. For example, a 2,000 square foot residential home would have a valuation of \$140,000.00. Based upon the schedule below a \$140,000.00 valuation would require a building permit fee of \$993.75 (40*\$5.60) = \$1,217.75.

Total Valuation-Commercial: The minimum total valuation of \$85.00 per square foot of total area under roof shall be used to determine the valuation for the purpose of computing permit fees in accordance with the Building Permits Fee Chart or whichever is greater. For example, a 5,000 square foot commercial building would have a valuation of \$425,000.00. Based upon the schedule below a \$425,000.00 valuation would require a building permit fee of \$993.75 (425*\$5.60) = \$3,375.75
